

Кузнецов Г.В.

1. Batishcheva, K.A., Kuznetsov, G.V., Orlova, E.G., Vympina, Y.N.
Evaporation of colloidal droplets from aluminum–magnesium alloy surfaces after laser-texturing and mechanical processing
(2021) Colloids and Surfaces A: Physicochemical and Engineering Aspects, 628, статья № 127301, .
DOI: 10.1016/j.colsurfa.2021.127301
2. Kuznetsov, G.V., Ponomarev, K.O., Feoktistov, D.V., Orlova, E.G., Lyulin, Y.V., Ouerdane, H.
Heat transfer in a two-phase closed thermosyphon working in Polar Regions
(2021) Thermal Science and Engineering Progress, 22, статья № 100846, .
DOI: 10.1016/j.tsep.2021.100846
3. Kuznetsov, G.V., Maksimov, V.I., Nagornova, T.A., Voloshko, I.V., Gutareva, N.Y.
Experimental study of the temperature distribution over the surface of a heat supply object under heating conditions with a gas infrared emitter
(2020) Journal of Physics: Conference Series, 1675 (1), статья № 012118, .
DOI: 10.1088/1742-6596/1675/1/012118
4. Kuznetsov, G.V., Ponomarev, K.O., Feoktistov, D.V., Orlova, E.G., Ouerdane, H., Lyulin, Y.V.
New approach to the heat transfer modeling in the coolant layer on the lower cover of a thermosyphon
(2020) International Journal of Heat and Mass Transfer, 163, статья № 120555, .
DOI: 10.1016/j.ijheatmasstransfer.2020.120555
5. Antonov, D.V., Kuznetsov, G.V., Strizhak, P.A.
Mathematical Simulation of the Heat and Mass Transfer in the Movement of Liquid Droplets in a Gas Medium Under the Conditions of their Intense Phase Transformations
(2020) Journal of Engineering Physics and Thermophysics, 93 (5), pp. 1055-1076.
DOI: 10.1007/s10891-020-02207-3
6. Antonov, D.V., Fedorenko, R.M., Kuznetsov, G.V., Strizhak, P.A.
Modeling the micro-explosion of miscible and immiscible liquid droplets
(2020) Acta Astronautica, 171, pp. 69-82.
DOI: 10.1016/j.actaastro.2020.02.040
7. Lyulin, Y.V., Kabov, O.A., Kuznetsov, G.V., Feoktistov, D.V., Ponomarev, K.O.
The effect of the interface length on the evaporation rate of a horizontal liquid layer under a gas flow
(2020) Thermophysics and Aeromechanics, 27 (1), pp. 117-121.
DOI: 10.1134/S0869864320010114
8. Misyura, S.Y., Kuznetsov, G.V., Feoktistov, D.V., Volkov, R.S., Morozov, V.S., Orlova, E.G.
The influence of the surface microtexture on wettability properties and drop evaporation
(2019) Surface and Coatings Technology, 375, pp. 458-467.
9. Kuznetsov, G.V., Kurilenko, N.I., Nee, A.E.
Mathematical modelling of conjugate heat transfer and fluid flow inside a domain with a radiant heating system
(2018) International Journal of Thermal Sciences, 131, pp. 27-39.

DOI: 10.1016/j.ijthermalsci.2018.05.010

10. Glushkov, D.O., Kuznetsov, G.V., Strizhak, P.A., Syrodoy, S.V.
A Mathematical Model for Processes in Coal-Water Slurries Containing Petrochemicals under Heating

(2018) Energy and Fuels, 32 (8), pp. 8789-8802.

DOI: 10.1021/acs.energyfuels.8b01562

11. Kuznetsov, G.V., Nee, A.E.

Conduction, convection, and radiation in a closed cavity with a local radiant heater

(2018) Frontiers in Heat and Mass Transfer, 10, статья № 26, .

DOI: 10.5098/hmt.10.26

12. Kuznetsov, G.V., Kats, M.D.

Methodological Errors of Defining the Thermophysical Characteristics of Materials Using the Laser Pulse Method at High Temperatures

(2018) Measurement Techniques, 60 (10), pp. 1032-1037.

DOI: 10.1007/s11018-018-1314-8

13. Kuznetsov, G.V., Zyubakov, V.Yu., Nee, A.E.

Numerical investigation of conjugate mixed convection in a rectangular cavity with heat-conducting walls of finite thickness under conditions of radiant energy supply

(2017) Heat Transfer Research, 48 (16), pp. 1459-1472.

DOI: 10.1615/HeatTransRes.2017015635

14. Kuznetsov, G.V., Katz, M.D.

Analysis of conditions for determining the thermophysical characteristics of energetic materials by the laser pulse method

(2016) Russian Journal of Physical Chemistry B, 10 (6), pp. 978-982.

DOI: 10.1134/S1990793116060051

15. Kuznetsov, G.V., Maksimov, V.I.

Experimental Investigation of the Mixed Convection of a Gas in a Rectangular Enclosure with a Local Heat Source and Heat Removal at the Outer Boundaries

(2016) Journal of Engineering Physics and Thermophysics, 89 (5), pp. 1241-1246.

DOI: 10.1007/s10891-016-1487-4
